

## **Proposed BDCP Site-Specific Near-Term Habitat Restoration Projects**

### **Current “Phase 1” Projects**

**Phase 1** = BDCP habitat restoration projects for which sufficient information is available to describe and analyze effects of the project in sufficient detail to secure all necessary compliance to allow implementation at issuance of the BDCP ROD/NOD (i.e., “shovel ready”).

- Fremont Weir fish passage improvements
- Calhoun Cut/Lindsey Slough tidal habitat restoration (Owner = DFG; Parcel = 927 acres; ≤ 165 acres tidal marsh restored)
- Yolo Ranch tidal habitat restoration (Owner = Westlands; Parcel = 3,408 acres; 600-1,500 acres tidal marsh restored)
- Dutch Slough tidal habitat restoration (Parcel = 1,166 acres; 390-830 acres tidal marsh restored)\*
- Decker Island (NE tip; Owner = DFG; ≤ 10 acres tidal marsh restored)
- McCormack-Williamson Tract/Grizzly Slough (Owner = TNC and SWC; Parcel = 1,800 acres; 1,200-1,300 acres tidal marsh restored; possible flood control benefits)\*

### **Current “Phase 2” Projects (Partial)**

**Phase 2** = BDC habitat restoration projects for which sufficient information is available to partially describe and analyze effects in the EIR/EIS to allow for the Management Entity to implement in the BDCP near-term with subsequent CEQA/NEPA documentation and compliance.

- Fremont Weir modifications for seasonally inundated floodplain enhancement
- Lisbon Weir fish passage enhancement
- Putah Creek fish passage enhancement (Owner = DFG; 10 acres of tidal habitat and 50-500 acres of seasonally inundated floodplain restored)
- Meins Landing tidal habitat restoration (Parcel = 660 acres; ≤ 630 acres tidal marsh restored)\*\*
- Hill Slough tidal habitat restoration (Owner = DFG; Parcel = 1,750 acres; ≤ 850 acres tidal marsh restored)\*\*
- Rush Ranch tidal habitat restoration (Owner = Solano Land Trust; Parcel = 2,070 acres; 70 acres tidal marsh restored)—(subject to confirmation by Solano Land Trust)
- Prospect Island tidal habitat restoration (Owner = DWR; Parcel = 1,300 acres; 460-1,300 acres tidal marsh restored)

---

\*EIR has been prepared for this project.
